OUR MISSION STATEMENT

- To reduce pregnancy-related mortality to zero and morbidity to the barest minimum.
- To eliminate hunger amongst the impoverished through economic empowerment.
- To provide and increase access to basic quality education for the vulnerable

OUR GOAL

- To provide free and quality primary healthcare services.
- To provide quality education for the less privileged and vulnerable children.
- To eradicate poverty and hunger in the rural area.

OUR *Vision*

We aim to become the foremost nonprofit organization providing solutions to poverty-related problems in Africa.

MESSAGE FROM THE MANAGING DIRECTOR

In 2017, We gave birth to the ideas that have been in our minds for years and founded Keeping Hope Alive Foundation which later became Seyifara Foundation. We were inspired by the love we have for our society yet horrified by the conditions in which they lived. Having experienced some of these issues and know how bad it is to be underserved, we committed ourselves to ensuring that less privileged women and children have the opportunity to quality free health care for mother and child, quality primary education, and access to food (agriculture) to grow up with the love and care they deserve.

Oluwaseyi ADEDIRAN

Seyifara
Foundation

BACKGROUND

Seyifara Foundation A/K/A Seyifara Foundation Inc was first incorporated in the United States of America in 2017/2018 with Tax ID Number: 82-3528021, headquartered in Glen Burnie, Maryland, with a branch registered in Nigeria under the same name Seyifara Foundation RC: I23679 incorporated in January 2019.

WHO WE ARE

Seyifara Foundation is a nonprofit organization, and our goal is to improve the livelihood of the most vulnerable and less privileged in Africa by Eradicating Poverty and Hunger, Reducing Child Mortality and Improving Maternal Health, and Providing Access to Education for vulnerable children. The foundation

welcomes partnerships and collaborations that would further enhance the targeted goals.

OUR 3 FOCUS AREAS ARE:

- Primary Healthcare
- Education
- Hunger

OBJECTIVES

To provide essential primary healthcare services to pregnant women and children between the age of 0 to 5 years in order to eliminate Under-5 Mortality Rates (U5MR) through our Social Health Project (Access for Impact).

To support the less privileged and the most vulnerable children between the age of 0 to 10 years with a quality basic primary education required for early-stage development through our Social Education Project.

To enhance rural economic activities and achieve sustainable economic empowerment using agriculture as an economic tool through our Social Agriculture Project.

MATERNAL AND CHILD HEALTH

Maternal health is the health of women during pregnancy, childbirth, and the postpartum period. It encompasses the health care dimensions of family planning, preconception, prenatal, and postnatal care in order to ensure a positive and fulfilling experience, in most cases, and reduce maternal morbidity and mortality, in other cases.

According to Unicef Data, despite the global progress in reducing child mortality rates over the past few decades, an estimated 5.2 million children under age five died in 2019 and more than half of those deaths occurred in sub-Saharan Africa.

Nigeria's maternal mortality rate was estimated at 814 per 100,000 and its under-5 child mortality rate was estimated at 109 per 1,000. Both of these are still among the world's highest.

More than one third of all children's deaths occur within the first month of birth. Providing skilled care to mothers during pregnancy and after birth greatly contributes to reducing maternal mortality and child morbidity. This is why SF has decided to implement Access for Impact (AFI) as her first project and we believe we can collectively make a greater impact with your support.

This project will encourage early child bookings, skilled child attendants, and the use of necessary vaccines amongst the most vulnerables, the underserved and the less privileged in the society who often settle for Traditional Birth Attendant (TBA).

Factors: Identifiable challenges for maternal mortality.

- Proximity
- Uneven distribution
- Affordability (Cost)
- Education

Hope: Preventable through public health interventions.

Access For Impact Project (Afi):

Access for Impact (Afi) is simply a free quality health care system, developed to cater for the deprived, impoverished and most vulnerable that settles for quark traditional medicine due to lack of access and financial capabilities to afford a quality health care system.

Access for Impact will provide women in the rural communities to skilled healthcare during their reproductive lives. This will reduce the economic impact and geographical barriers to accessing skilled care in rural communities, provide adequate and quality health services to pregnant women, create a healthcare system acceptable by all cultures and religious groups, and as well ensure accountability in order to improve quality of care and equity.

Research has shown that about 7 million under-five deaths were recorded in 2011, 41% of these deaths occurred in sub-Saharan Africa.

Proximity, uneven distribution, and affordable health care facility has been identified as part of factors contributing to maternal and child mortality.

The vast majority of the deaths are preventable using low-cost public health interventions but unfortunately, these preventable deaths of under-five children remain very high in sub-Saharan Africa.

Proximity: Our implementing partner, Bismo Medical Center, has the goal of providing health care services regardless of geographical location and we have decided to partner with them so that our women will have convenient access to quality healthcare services.

Uneven Distribution: Uneven distribution of healthcare infrastructure by the government. Those living in the rural areas are often neglected in government plans. We, therefore, partnered with Bismo to provide free and quality healthcare services across the 774 local governments in Nigerian and across Africa to bridge the gap between the rich and the poor and we have decided to commence from IDO LGA, Oyo State, Nigeria.

Affordability: Through our social health initiative, Seyifara is not only determined to provide affordable quality healthcare but also a totally free quality healthcare to the most vulnerable women within our society regardless of their ethnicity or religion.

Education: In this regard, education is not expected to be a formal university education but a form of sensitization that would inform our women on what is expected of them to stay healthy before, during, and after pregnancy. That is why we have also partnered with our public health professional to ensure the antenatal and postnatal of our women includes an effective sensitization process.

COVID-19 SUPPORT:

Countries in Africa are not only facing increasing cases of COVID-19, the respiratory disease caused by the coronavirus, but also economic recession. The lack of infrastructure across all sectors and more specifically in the health sector has exposed the populace to the impact of the virus and has diminished their livelihood during the pandemic and has consequently increased the vulnerable within our society.

The month of April 2020 was an incredible month of hope, joy, and compassion to help meet the dire need of those living in abject poverty in Nigeria. Although our objectives differ from what COVID-19 presented to

the world, however, we believe the unique goal of all our humanitarian support which is to save lives and improve the livelihood of the vulnerable, which could still be achieved by supporting the vulnerable during the lockdown. We offered different palliatives measures across the geopolitical zones in Nigeria.

Over 100 families were supported with the basic needs of life (food) during this period in order to help combat the extreme hunger caused as a result of Covid-19 Pandemic restrictions and curfews. Items shared were Rice, Potatoes, Gari (Cassava), Cooking oil, Seasoning, Noodles, Guinea Corn, Salt,

Tomatoes, Onions, Sweet Potatoe just to mention a few.

Thanks to our team of volunteers who offered their precious time in handling out the relief packs. We also supported some people with cash considering their specific needs and we ensure we verified they are all among the extremely vulnerable within our society.

As one of our objectives is to provide social healthcare to impoverished pregnant women, we ensure we do not leave them exposed during the pandemic. We commenced our Access for Impact (Afi) Project which focuses on maternal and child health.

Our Social Healthcare Program called Access for Impact (Afi) Project, where vulnerable and less privileged women are given the opportunity to access quality healthcare during pregnancy and after childbirth at NO COST. The social health care services further include necessary

vaccines and health services for the first 5 years of the child delivered through Seyifara and also includes cesarean section if prescribed by our healthcare service provider.

Our goal is to save 1 million lives in the next 10 years, and we believe we are on the right path to achieve this.

"Alone we can do so little; together we can do so much." – **Helen Keller**

SF 2020 ANNUAL REPORT CHARTS

Index	No of Child
A	1
B	2
C	3
D	4
E	5

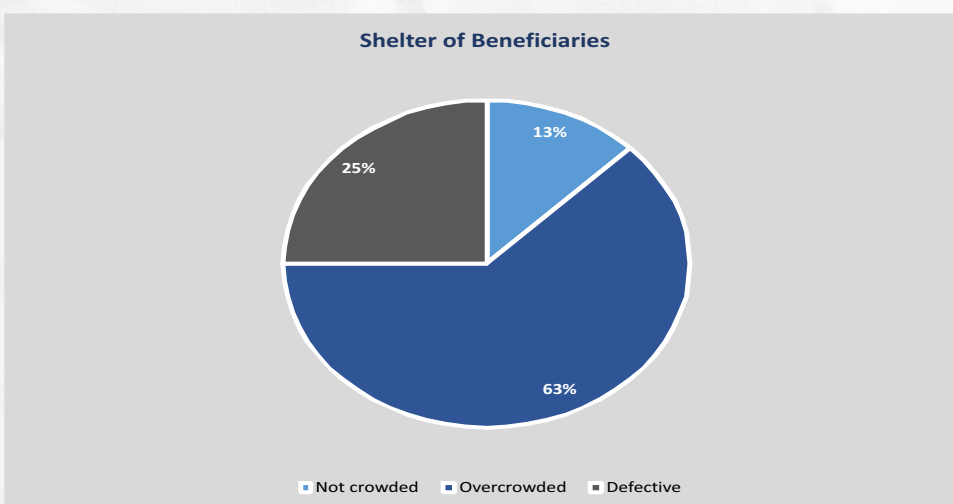

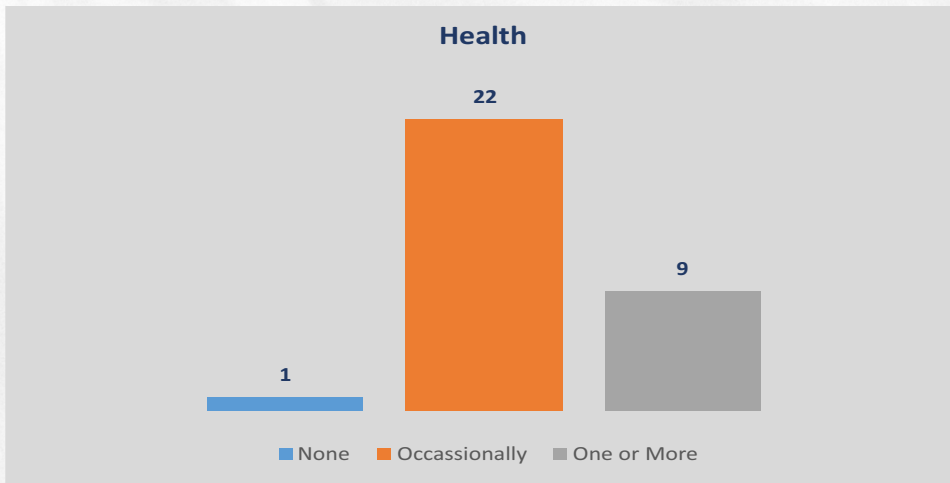

Parity: Number of times that a beneficiary has given birth to a fetus with a gestational age of 24 weeks or more.

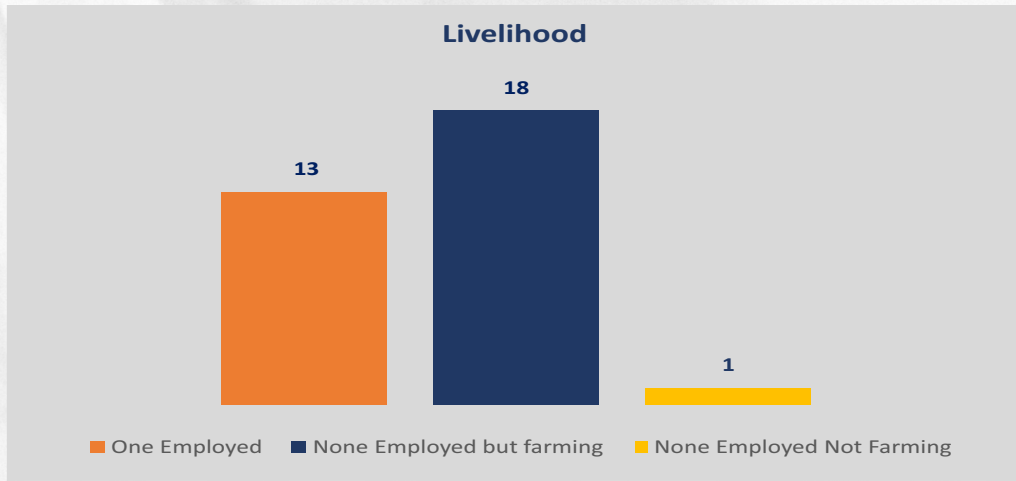

Trimester: A division of the duration of pregnancy.

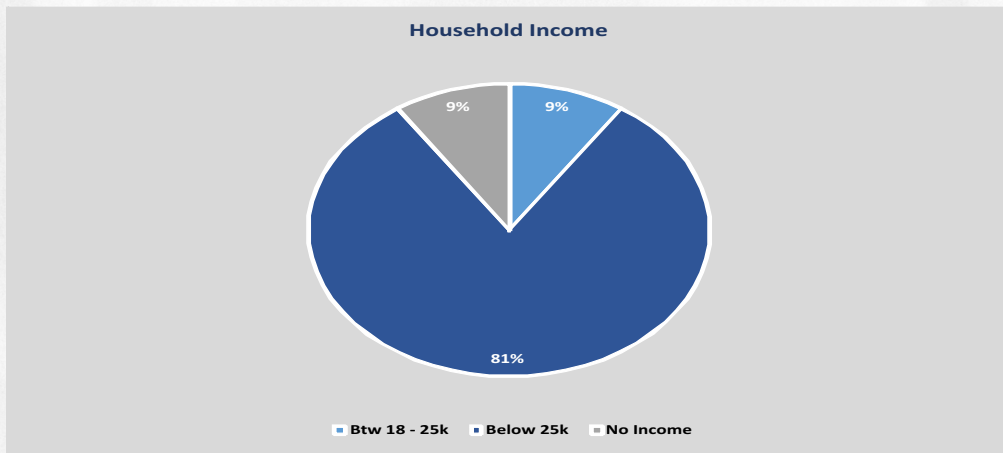

Household Headship: Main economic provider of the household

Livelihood: A means of securing the necessities of life.

Statement of Financial Activities for the Year Ended 31 December 2020

Excess(Deficit) Income for the Year	1,511,388.50	\$3,816.64

Our GOAL **For 2021**

Is to serve 2 more communities, effectively improve the lives of 10,000 households. In 2020 our goals align around awareness of the free service we offer, continuing to improve the lives of vulnerable and impoverished women and children in our communities.

Move from a self-funded charity organization to public funded organization.

Improve our administrative quality.

Continue to provide financial transparency to our donors and aspiring donors.

Regular awareness events and communications on our on-going project.

Organize maternal base free for all programs about the importance of early child bookings and vaccines.

We Need **YOUR Help:**

Seyifara Foundation has been a self-funded organization since 2017 with 99.6% of its funds coming from the board of directors and 0.4% from generous donors who had shown us love in their own little way.

It is primarily through monthly donations from BODs that we are able to provide reliable ongoing projects to the communities we serve.

Through years of experience, we have found out the most sustainable way to help those in need is through recurring donations from donors who are willing to support our cause. It is transforming and measurable. Join us to help the world we live in.

Please remember there is no minimum amount - every bit helps in a way.

Amazon giving-Remember, always start at smile. [amazon.com](https://www.amazon.com) and search Seyifara Foundation. Amazon will donate 0.5% of the price of your eligible Amazon Smile purchases, at NO COST to you.

Please promote the vision and encourage colleagues in your sphere of influence to contribute to our cause.

Please consider joining our programs -

We really need your help like never before.
